

Who is the right person for your appointment?

GP - If a patient's condition cannot be cared for by the various members of the nursing team this will be handled by one of our GP's

Registrar/FY2 - These doctors are fully qualified and completing their training, they care for the same conditions as our GP's

Advanced Nurse Practitioner - In addition to the nursing team/nurse practitioner our advanced nurse practitioner can triage, diagnose and treat patients presenting with minor illness and also prescribe medications

Nurse Practitioner: Can be seen for many conditions including acute back pain/joint sprains - acute chest infections - sticky eyes - cystitis - diarrhoea/constipation/piles - dizziness/headache - earache/swollen glands - wounds, scalds burns rashes - tonsillitis/sinusitis- urinary tract infections - menstrual disorders, breast lumps, depression and contraception

Nurses - They can help with health issues such as family planning, ear syringing, travel vaccinations, dressings, removal of stitches, blood pressure checks, health checks and cervical smears . They also perform routine contraception and HRT reviews

Assistant Practitioner - Can care for Long term condition reviews - BP checks - ECG - Injections

Physiotherapist - Can help with rehabilitating physical problems caused by illness, injury, disability or aging, through treatment. Appointments can be booked directly by reception without seeing a GP
